EXPERIENCE

▷ **Software Engineer — Z14 AI Solutions** *Dec 2025 – June 2026*

- Developed and managed 2 corporate websites, improving user engagement by approximately 20%.
- Led end to end website deployment and maintenance, reducing production issues by 15%.
- Collaborated with leadership on technical planning and business strategy, supporting multiple client acquisition initiatives.
- Prepared business presentations and technical proposals contributing to successful stakeholder engagements.
- Participated in client meetings and solution discussions, helping secure new business opportunities.
- Mentored interns and supported recruitment activities, assisting in candidate screening and technical evaluations.
- Contributed to a Python-based sustainability prototype addressing product obsolescence challenges, reducing manual analysis effort by an estimated 25%.
- Coordinated development priorities across technical and business teams to improve project delivery efficiency by 20%

▷ **Programmer Analyst Trainee — Cognizant** *Aug 2025 – Nov 2025*

- Onboarded to a pharmaceutical client project and contributed to an MVC-based full-stack application
- Developed frontend components and supported backend integration, gaining hands-on experience across application layers
- Worked with existing application workflows, debugging, integration, and enterprise development practices.

▷ **Intern — Cognizant** *Apr 2025 – Jul 2025*

- Completed enterprise training in .NET, SQL Server, REST APIs, Git, Unix, Agile, and software engineering practices.
- Led a 5-member team in developing a **Bank Loan Management** System using ASP.NET MVC, C#, SQL Server, Bootstrap, and REST APIs.
- Coordinated Agile sprints and achieved 100% milestone completion across the training project.
- Designed database workflows that reduced loan-processing turnaround time by approximately 20%.
- Applied Git-based development and Agile practices to improve team collaboration and delivery efficiency by 15%.

PROJECT & PUBLICATION

▷ **Crop Classification Using Deep Learning**

Tools: *Deep Learning, Machine Learning, Python, Data Analytics*

- Developed a deep learning model for crop classification using Python, achieving classification accuracy above 90%.
- Applied machine learning and data analytics techniques to improve agricultural decision-making.
- Presented research at an **international conference (ICNGSDSCA-24)** and contributed to a **published research paper**.

TECHNICAL SKILLS

- **Programming Languages:** Python , C , JAVA , C#
- **Web Development:** React.js, HTML5, CSS3, JavaScript, jQuery, Bootstrap, Tailwind CSS, ASP.NET Core
- **Database Management:** SQL, SQL Server, MySQL, SSMS, Firestore
- **Tools:** Git, REST APIs, Selenium, Unix Shell Scripting, XAMPP
- **Concepts:** Full-Stack Development, Web Application Development, SDLC, OOP, Agile Methodologies, Problem Solving

CERTIFICATIONS

- **Microsoft Azure AI Fundamentals –** Microsoft
- **Build NLP with Azure AI Language –** Microsoft
- **Google Cybersecurity Specialization –** Coursera
- **Google AI Essentials –** Coursera
- **Python –** HackerRank , Infosys Springboard
- **DBMS & SQL –** Infosys Springboard

EDUCATION

▷ **B.E. Information Science & Engineering — Cambridge Institute of Technology, Bengaluru** *2021 - 2025*
